

My Report

What we have for you

Interest

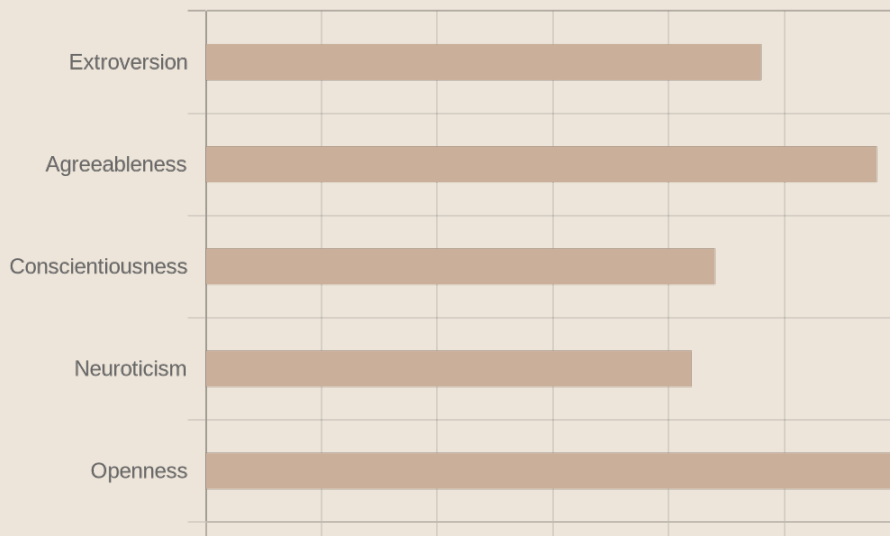

The interest assessment clarifies job descriptions, work personality, and interests. This assessment gives a clear idea of the self-knowledge and world of work.

Aptitude

Aptitude is an innate ability to learn by training and education in the subject. Knowledge and skills are learned in school or academic setting, or through real life experiences. This assessment is a group of tests designed to determine an individual's ability. Different abilities are measured using different subtests administered to the individual. The assessment highlights your current expertise in each of these seven abilities. The assessment helps you to understand the next step in your education and decide a career based on the level of your abilities.

Personality

Personality assessment gives you an insight about oneself. Personality differentiates each individual in various aspect in thinking, feelings, and behaving. Personality is a scientifically proven factor that predicts career selection and performances. When you are pursuing a career personality assessment can help you establish your strength and limitations. Knowing oneself before choosing a career is very essential as it helps you identify what makes you happy, motivates you, and Personality determines your work styles, why you fit in one career domain and why you don't fit in one career domain.

Openness

Agreeableness

CDMS

Decision-making is the method of distinguishing and choosing alternatives that supported your distinctive preferences. Winning career designing needs you to form many selections, a capability to align goals, and so to grasp the way to reach them. Usually, career choices measure among the foremost difficult decisions you'll ever make throughout your life. They're the idea of your major choice(s), spot and co-curricular involvements, and your 1st job. Ideally, you would like to be ready to keep choices, which implies you would like them to possess a high likelihood of success. However, decisions involve uncertainty that makes many of us uncomfortable. Right decision making will decrease the degree of uncertainty and increase your possibilities of achieving your required goal.

CDS

Career decidedness refers to the level of confidence or certainty about intended career paths individuals would like to pursue and develop after leaving school.
